

WEEKLY SAFETY MEETING

SIGNS, SIGNALS & BARRICADES

Signs, signals and barricades are warning and protective devices used to protect employees from potential hazards and hazardous areas on jobsites and in traffic areas. When you see warning signs at your work site, you should know what they mean and why they are there.

- ✚ Constantly look for warning signs, signals and barricades while working. They are there for your protection.
- ✚ **DANGER** signs refers to an immediate/imminent hazardous situation which, if not avoided, will result in death or serious injury.
- ✚ **WARNING** signs indicate a potentially hazardous situation which, if not avoided, could result in death or serious injury. Warning signs are typically on pieces of equipment warning operators of safety precautions.
- ✚ **CAUTION** signs refer to potential hazards or caution you against unsafe work practices. If this situation is not avoided, it could result in minor or moderate injury.
- ✚ **Notice signs** are used for instructional purposes and are also placed around jobsites in strategic locations.
- ✚ **Directional signs** are used to mark safe and efficient routes of travel both form vehicles and personnel.
- ✚ Employees that are hand signaling to direct traffic are required to wear ANSI Type 2 high visibility traffic vests and use 18" x 18" orange flags.
- ✚ Coordinate with other flagmen and communicate with a radio if you do not have visual contact.
- ✚ **Exit signs** point to safety. Exit signs when required, **MUST** have red legible letters at least 6 inches high, on white background and are placed to exit a building.
- ✚ **Safety Instruction signs** are used for injury/incident prevention. They are usually placed around jobsites in strategic locations.
- ✚ **Accident Prevention tags** are temporary warning tags usually placed on defective tools or equipment.
- ✚ **Lockout tags** used to tag out sources of uncontrolled energy that cannot be locked out with a lock.
- ✚ **DANGER / CAUTION** tape and signs/placards **MUST** be posted on all sides of entry.
- ✚ Do not mix **DANGER** and **CAUTION** signage. Use **DANGER** placards with **DANGER** tape. Use **CAUTION** placards with **CAUTION** tape.
- ✚ **As a safe work practice, if at all possible, place barricades at least six (6) feet back away from for your work area.**
- ✚ **Place the tape with the print upright so it is clearly legible.**
- ✚ **DO NOT CROSS** an area barricaded off with red **DANGER** tape unless you have installed it or have received permission from the person who installed it.
- ✚ **DO NOT** remove any **DANGER / CAUTION** signs, barricades or flags unless you have placed them there or have been authorized to remove them.
- ✚ After your work is complete, tape and signs **MUST** be removed and discarded appropriately. Do not leave bits and pieces laying around.
- ✚ Flagged warning lines, stanchions, or cones can be erected and strategically placed to warn operators when encroaching to the minimum approach distance of overhead powerlines.
